

BARCELONA GALLERY WEEKEND 2021

ALALIMÓN GALERIA VANESA MUÑOZ Biography

The work by Vanesa **Muñoz Molinero** (Madrid, 1979) is influenced by Russian Constructivism and the formal and chromatic tensions of Anish Kapoor and Richard Serra, the abstraction of form and the emotional value of matter, as well as the coldness of optical art.

Her art is totally abstract, she works in an artisanal way, avoiding technological advances to a certain extent, striving for the excellence of technique as the only way of projecting the forms that come from fractions of thought, without which she could not exist.

Muñoz moved to Barcelona in 2000, where she studied Philosophy at the University of Barcelona (2009), after graduating as a Superior Technician in Sculpture at Escola Massana in Barcelona (2006) and Superior Technician in Metal Sculpture at Escuela La Palma in Madrid (1999).

After finishing her philosophy studies, she moved away from the anthropological approach, taking mathematical and physical aspects as her only source of creation.
