LUÍS FEO

Biography

Through observation, **Luís Feo** (Toledo, 1975) creates a very meticulous type of drawing that reminds us of scientific illustrations. Using the graphite and airbrush technique, he explores subjects such as fauna, the spaces where it transits and also makes reflections on the time we have left, with his vanitas.

In the mastery he displays, one can see echoes of great names in drawing and engraving such as Dürer, Piranesi, Escher and Man Ray, among others. Luís Feo shows a precision typical of the great geniuses. His drawings manage to surprise the viewer.

Few artists reach such levels of perfection. His observation is as refined as his technique and due to this almost taxidermic gaze, he manages to draw beyond the known reality.

He studied Fine Arts in Madrid and since 1998 he has participated in several national and international exhibitions such as Swab (Barcelona), Art Fair (Cologne), Cross Road (London), Gabinete (Madrid), DrawindRoom (Madrid), Kunst Rai Art (Amsterdam). He has also been awarded first prize at the LII Premi Internacional de Dibuix Ynglada-Guillot, Barcelona.
