# LAURENCE VALLIÈRES

## Biography

**Laurence Vallières** (Quebec, Canadá, 1986) has dazzled the world with her large-scale sculptural work in cardboard. Vallières studied visual arts at Concordia University before doing an exchange programme in Los Angeles to improve her knowledge of ceramics. It was after graduating and doing an artist residency in Russia that she embraced the influence of urban art in her work. By using cardboard, a material she finds in abundance on the street, she is able to create great work anywhere in the world.
