GRIP FACE

Biography

Installed in the astuteness of a pseudonym that favours the discretion and freedom of anonymity, **Grip Face** (Palma de Mallorca, 1989) was trained from a very early age in the schools of drawing and classical painting. A multidisciplinary artist who generally sets his coordinates in the public space, at the age of thirteen he discovers the multiple possibilities offered by public art, in whose dimension he soon feels comfortable to transfer his mechanisms to his own terrain.

From contemporary graphics, through installation and painting, he works from the most graphic to the most conceptual languages, and for years he has been creating a bridge between the public and the exhibition spaces.
