BELIN

Biography

Miguel Ángel Belinchón (Linares, Jaén, 1980) is one of the most important figures on the urban art scene, with a refined, unique and hyperrealist technique achieved through spray paint. His aim is the same as that of urban art: to go beyond the canvas in order to get onto the walls of streets all over the world.

His recognisable aesthetic, which he himself calls Post-Neo-Cubism, is an amalgam that is really difficult to categorise, as his works transport us to hyperrealism, cubism, graffiti, or collage. His constantly evolving style is a source of influence and inspiration for other artists.
