DAVID MORENO

Biography

The sculptures by **David Moreno** (Barcelona, 1978) are transformed into drawings in space. Thanks to the juxtaposition of small steel rods, Moreno draws vigorous drawings that go beyond two-dimensionality to become three-dimensional. From the interweaving of these thousands of rods emerge, almost magically, architectural references of a disturbing, phantasmagorical poetics.

Throughout his career Moreno has participated in numerous solo and group exhibitions both nationally and internationally, in cities such as Barcelona, Lisbon and Berlin. His work is currently in several private collections.
