GIL GELPI

Biography

Gil Gelpi (Lisboa, 1985) does his first art studies at Ar.Co and Antonio Arroio art schools before finishing his film studies in E.S.T.C. university. In 2009 he moved to Barcelona, where he currently lives and has been working as assistant to artist Samuel Salcedo since 2011.

Inspired by philosophers Gilles Deleuze, Félix Guatarri and Spinoza's concept of substance. Gil Gelpi interprets the human body and all that exists as a substance in constant state of becoming. In his creations we can detect a rhizomatic logic; a form of intuitive growth that follows an almost bacterial pattern, where the inside melts with the outside, concentrating in itself impulses and emotions, flows and energies, memories and guts, that at every moment are changing, breathing, imagining...

His work is present in several private collections in Canada, USA, Mexico, Austria, UK, Slovakia, Spain and Portugal.
