

GERARD MAS

(1976, San Feliu de Guíxols, Gerona)

The sculptor Gerard Mas studied at the School of Arts and Crafts in Barcelona and Conservation and Restoration of sculpture. The work of Gerard Mas is characterized by formal precision and perfection in the execution of pieces made with traditional materials such as alabaster and marble, slightly polychrome. The realistic forms of his characters, usually inspired by the great classical artists, show discreetly anachronistic attitudes, creating a tension that surprises the viewer. Their Renaissance women are frozen in time and sculpted as they blow gum, show their orthodontics or caress a gentle rat on their lap.

His works in resin show the same formal perfection, but the use of this more contemporary material and color reaffirms the contemporary nature of his works. Mas has participated in numerous solo and group exhibitions, and his work is in collections such as MEAM (European Museum of Modern Art), Vila Casas Foundation, MEFIC (Museum of Contemporary International Figurative Sculpture) Murcia. In addition, he has been winner in 2001 and 2002 of the First Prize in the Ice Sculpture Competition organized by the School of Architecture of the International University of Catalonia.
